

INVITATION

Welcome to join and learn more about batteries! The CaBatt network is pleased to invite you to BaTT Teachers forum on **"Raw materials and recycling of lithium batteries"**. *Together with European peers, you will explore the theme of raw materials and recycling.* You will participate in online and onsite lectures led by experts, visit the Kokkola Industrial Park (KIP) to learn about Jervois and its cobalt-based products, as well as Keliber's lithium refinery, and engage in interactive workshops.

Target group: Teachers within vocational education and training working with battery industry and applications.

The course consists of two parts: The course will be provided through an online course with webinars and by an in-person meeting in Vaasa, Finland 13-15.05.2025, where you will participate in lectures, a workshop and site visits to real use cases.

Part 1 – Online course – A 16-hour online course (2 x 4 hours online and 8 hours self-study, which aims to give the participants enough basic knowledge of the battery industry before the physical event. Dates of online course: 8.04.2025 and 29.04.2025

Part 2 – physical course – A 3-day in-person meeting in Vaasa, Finland with lectures, workshops and company visits, gathering around 30 VET teachers and trainers from around Europe. Dates of physical course: 13.-15.05.2025

Find out more about the BaTT Forum course on Battery Raw Material and Recycling through this link [Event Invitation – CaBatt](#). You will find the goals of the course, the program, registration and information on travel arrangements.

Deadline for registration: 28.2.2025

Welcome to Vaasa, Finland!

About BaTT Forum

The Batteries Teachers & Trainers Forum (BaTT Forum) initiative was launched by the Alliance for Batteries Technology, Training and Skills (ALBATTs), an EU Erasmus+ co-funded project. It is now funded and further developed through the CaBatt (Capacity Building for Battery Teachers in Vocational Education and Training) Erasmus funded project (2023-1-FI01-KA220-VET-000160282) to develop Erasmus+ courses for VET teachers that are open to all and eligible for the VET schools own Erasmus+ mobility funding. The BaTT Forum aims to gather current and future teachers and trainers to share ideas and good practices, work together and deepen their knowledge about the battery sector.

The CaBatt project is a collaboration between Vamia (Finland), Skellefteå kommun (Sweden), Fagskulen Vestland (Norway), ATEC (Portugal) and VSB TUO (Czech Republic).
